Whetstone Geo

Whetstone Holdings LLC

Field first data.
Ground truth you can build on.

whetstonegeo.com

01

Company overview

Whetstone Geo is a field first data collection, reconnaissance, and ground truthing firm. We work primarily as a subcontractor to prime contractors on government work and operate in Montana and the surrounding region.

We turn ground truth into reliable project intelligence. AI and GIS analysis are only as good as the data collected in the field. We reduce informational risk by keeping every observation connected to reality, so the result is defensible evidence and decision ready intelligence.

02

Core competencies

FIELD SERVICES

- Field data collection
- Ground truthing and verification
- Field reconnaissance

SECTORS WE SUPPORT

- Environmental
- Forestry
- Wildlife and ecological
- Infrastructure

03

Differentiators

- **Field first.** Collection, reconnaissance, and ground truthing come before analysis. Software cannot walk the ground.
- **A documented standard.** Every project follows our field standards: evidence, verification, documentation, and traceability.
- **Observation before assumption.** Reality is the authority. Ground truth is the anchor.
- **Montana based field presence.** We work in Montana and the surrounding region.
